## Human Platelet Lysate GMP + Quarantine stored

CRUX RUFA **GMP-Q** represents the highest viral safety of the CRUX RUFA platelet lysates due to quarantine storage according to the German hemotherapy guidelines (3.1.4.2.). All donors for this quality of platelet lysate have undergone and passed serology and NAT-testing for blood-transmissible infectious diseases for a second time, at least 4 months after the platelet donation.

- Rich in growth factors and cytokines
- Consistent inter-batch quality
- Made in Germany
